architect and interior designer tiles portfolio

Balance and Proportion: In smaller spaces, light tiles can make the area feel larger and more open, while dark tiles can add depth and coziness. Balancing these two elements can help achieve the desired spatial effect. For instance, using light tiles on the floor with dark tiles on the walls can create a balanced look that feels grounded yet airy.

Pattern and Texture: Using light and dark tiles in patterns, such as checkerboards, stripes, or geometric designs, adds texture and depth to the space. These patterns can create a sense of movement and interest, making the space feel more dynamic. For example, a backsplash with alternating light and dark tiles can add a modern and stylish element to a kitchen or bathroom.
